

## PROJECT PROFILE

# COMMUNICATIONS

Metronode Data Centres

Expansion of leading data centre specialist Metronode, including building of 4 new state-of-the-art facilities in Victoria, New South Wales, Canberra and Perth. Construction was based on the Metronode 'BladeRoom™' data centre system.

### Client

Metronode Pty Ltd

### Location

Australia Wide

### Project cost

AUD \$105M

### Dates

2011 - 2013

### Our involvement

Aquenta was engaged to carry out pre-contract cost planning to assess the viability of the project budget. Any required increase to budget identified was subjected to value management workshops, with non value-adding elements of work being designed out or reduced.

Our post contract role involved the cost management of variations and progress claims and issuing regular financial reports to the Client.

### Services

Pre and Post Contract Cost Management, Value Management

### The outcome

Project successfully delivered whilst Metronode maintained 24/7 operational capabilities.
